

POWEREDGE R740xd2

Enterprise Content Server

Bring compute closer to storage with the R740xd2 to deliver fast response times. Large internal storage lets you keep your data safely on premise.

Respond effectively to data growth

The Dell EMC PowerEdge R740xd2 gives you the capacity to grow and helps you save space in a 2U rack. Flexible storage and performance options help you meet increasing business and data demands.

- Support large data sets like high-definition videos, SDS or large mailboxes with up to 26 3.5" drives.
- Drive consistent performance results with up to two 2nd Generation Intel® Xeon® Scalable processors.
- Balance performance and cost by choosing a combination of SSDs and HDDs.
- Minimize delays with fast networking options and up to 16 DIMMS of memory.
- Easily expand with up to 5 PCIe slots.

Simplify data center management

The Dell EMC OpenManage portfolio helps you spend less time on routine maintenance so you can focus on other priorities.

- Rapidly deploy configurations with your unique requirements on multiple servers.
- Provide full lifecycle management including firmware updates and automated issue resolution.
- Show status and set alerts for all attached physical and virtual disks through a single interface.
- Easily integrate with VMware vCenter or Microsoft System Center (SC).

Help maximize uptime and deliver comprehensive data center protection

Every PowerEdge server is made with a cyber-resilient architecture, delivering security into all parts of a server's life cycle. The R740xd2 uses these features so you can reliably and securely deliver the right data to where your customers are, no matter where they are.

- Minimize disruptions with 24 front-serviceable, hot-swappable, validated drives that offer enterprise-class reliability and extensive warranty options
- Prevent unauthorized or malicious changes with secure passwords, alerts and event logging
- Maintain data safety across your server, storage drives and RAID controllers with authenticated, signed firmware

Balance capacity and performance demands

- Store up to 416TB in a 2U rack server
- Avoid streaming delays with two-socket performance
- Scale-out to 8.3PB (520 drives) in a 42U
